

Test Plan - Gardening Web Store

General information

Project: Vida Verde

Test Environment:  Inicio | Vida Verde

Release/Version: ☒ Team 1 - Gardening Web Store | Releases | 1.0 UNRELEASED

Testing Team:

- Eva Saura
- Lucía Alcaraz
- Yohana Triana

- **Test Objectives**

- To validate the website functionalities corresponding to this version.
- To ensure that recent changes have not introduced errors in existing functionalities.

Test Scope

Devices and Browsers:

- Desktop: Chrome / Edge
- Mobile: Basic iPhone SE simulation

Features to test:

Clave	Resumen	Descripción
E1-8	Checkout	As a user, I want to complete my order So that I can finalize my purchase. Acceptance Criteria 1. "Proceed to Checkout" Button

Condition: Only appears when there are products in the cart.

Action: Clicking it takes the user to the Checkout page.

1. Checkout Page

2.1 Order Summary

Must include:

- Product names with their individual prices.
- Subtotal: sum of all product prices.
- VAT 21%: applied to the subtotal.
- Shipping: fixed at €5.
- Total: subtotal + VAT + shipping.

2.2 Shipping and Payment Form

Required fields:

- Full Name
- Email
- Address
- Valid Card Number
- Test valid card: 4242 4242 4242 4242

Buttons:

- Back to Cart → returns to the cart page.
- Complete Purchase → validates the form:
- If any field is invalid: display an error message.
- If all fields are correct: redirect to Order Completed page.

1. Order Completed Page

Must display:

- The order summary (product name and price, subtotal, VAT 21%, shipping €5, total), same as on the checkout page.

Buttons:

- Back to Shop → opens the products page.
- Go to Home → opens the home page.

As a user,

I want to have a shopping cart

So that I can review my order before completing the purchase.

Acceptance Criteria

1. Access to the Cart

The menu must display a cart icon.

When the user clicks the icon, the Shopping Cart page opens.

1. Add Products

The user can add products to the cart from the Products page.

When a product is added, the cart must display:

- Product name
- Product image
- Product category
- Product price

1. Remove Products

The user can remove products:

- From the Product page
- From the Cart page

When a product is removed, it disappears from the cart.

The total price updates automatically.

1. Purchase Summary

When the cart has products, it must show:

- Subtotal (sum of products)
- VAT (21%)
- Shipping cost (€5)
- Final total (Subtotal + VAT + Shipping)

Prices must update automatically when products are added or removed.

1. Clear Cart

- If there are products in the cart, a "Clear Cart" button is visible.
- When clicked, all products are removed.
- The cart becomes empty.

1. Empty Cart

- If the cart is empty:

The purchase summary is not visible.

A "View Products" button is shown.

Clicking it opens the Products page.

E1-6 Contact Page

As a user, I want to have a contact form so that I can communicate with the store.

Acceptance Criteria:

The form includes the following fields:

- Name (required).
- Email (required), must have a valid email format.
- Phone (optional), must have a valid phone format (numbers only or starting with a "+" prefix).
- Message (required, maximum 500 characters).
- A confirmation message must be displayed upon successful submission.
- Validation messages must be displayed if there are errors.
- The page must be responsive.

E1-5 Product Filters

As a user

I want to filter products so that I can easily find the one that fits my needs.

Acceptance Criteria:

- Filter by name: The system must display products whose name contains the entered text.
- Filter by price: The system must allow filtering by minimum price, maximum price, or a price range (minimum and maximum). Products within the specified range must be displayed.
- Filter by category: The available categories are Plants, Tools, and Pots. The system must display products belonging to the selected category.
- Filters can be combined with each other.
- If no matching results are found, an informative message must be displayed.
- When at least one filter is active, the user must be able to remove all filters using the "Clear Filters" option.
- After clearing the filters, the full product list must be displayed without any filters applied.
- If no filters are applied, the option to clear filters must not be available.

By default, the products page must be displayed with no filters applied.

E1-4	Products Page	As a user I want to see a products page so that I can see the products offered by the store. Acceptance Criteria: • The page displays the title "Our Products". • A list of products is displayed including the following information: category, name, and price. • The page must be responsive.
E1-3	About Us Page	As a user, I want to see an "About Us" page so that I can learn more about the store. Acceptance Criteria: • The page includes a title "About Us". • The page includes information about the store's history and values. • The page displays an image of the team. • It must be responsive.
E1-2	Home Page	As a user, I want to see a home page So that I can learn the store's relevant information. Acceptance Criteria: • A title with the store name is displayed. • A description is displayed. • An image of the store is displayed. • There is a button to open the store's products page. • It must be responsive.
E1-1	Navigation Menu	As a user I want to see a menu with links to Home, About Us, Products, and Contact so that I can easily navigate the site. Acceptance Criteria: • The menu displays the links: Home, About Us, Products, and Contact. • Each link navigates to its corresponding section. • The menu is visible on all pages. • It must be responsive.

8 incidencias

Entry Criteria

- User stories must be deployed in the test environment.

Exit Criteria

- All functional tests have been executed.

- There are no open critical bugs.
- All regression tests have passed.

Types of Testing

- Functional testing: for each user story included in the release.
- Regression testing: before each release and after each change, to ensure that existing functionalities have not been affected.
- Exploratory testing: before each release, to detect errors not foreseen by formal test cases.

Responsibilities

- QA: Designs and executes tests, reports errors, and documents the results.
- Development: Implements functionalities and corrects detected errors.

Test tools and data

- **Test management:** AssertThat.
- **Error report:** JIRA.
- **Automation:** Playwright
- **Test data:** Test Card: 4242 4242 4242 4242

Communication and Reporting

- All errors are managed in JIRA.
- A summary of results and errors found is documented in Confluence.

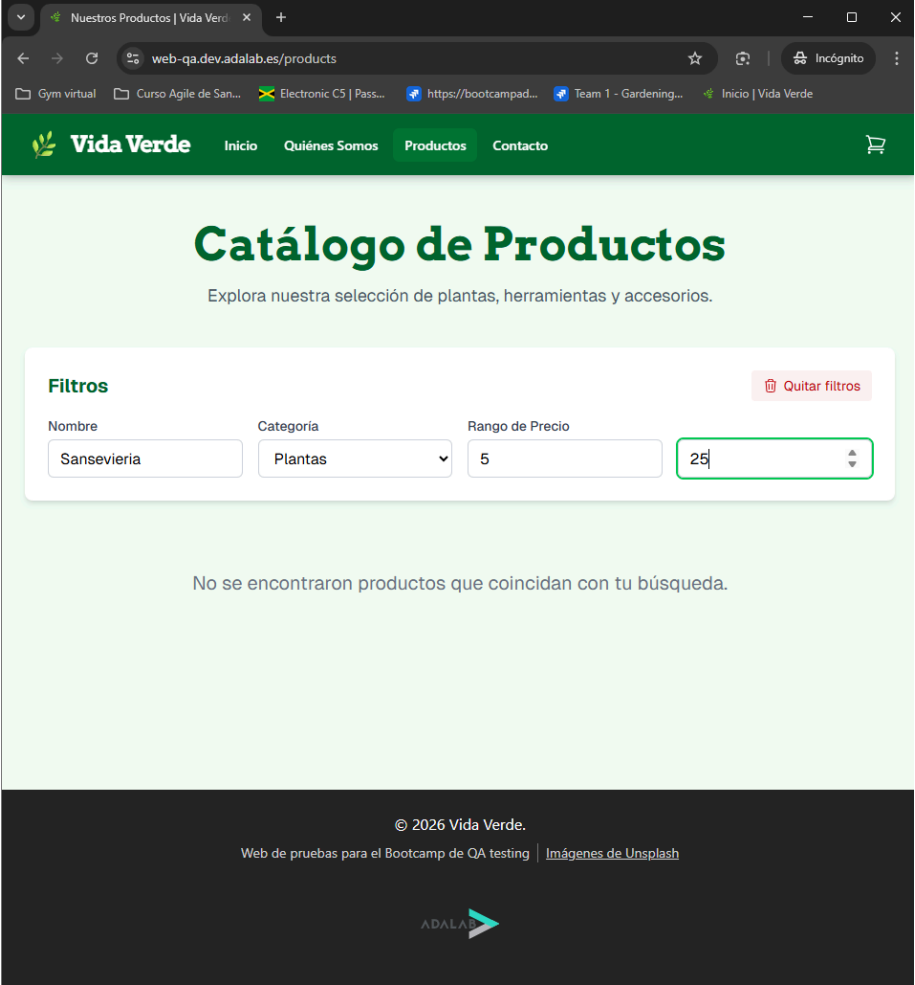

Test results

Results of functional tests performed: [Functional test results JIRA](#) / [Functional Test Results Github](#)

Results of regression tests performed: [Regression Test Results \(Automation\)](#).

Error Reporting

All errors detected during functional, regression, and exploratory testing were recorded.

Clave	Resumen	Descripción
E1-34	Combine all filters valid does not show results	Steps to reproduce: Given the user is on the Products page with no filters applied When the user applies a name filter "Sansevieria" And the user applies a price filter with minimum "5" and maximum "25" And the user applies a category filter "Plantas" Current Results: 
		Expected Results: It should display the selected product Additional information: Mobile Version Google Chrome browser desktop version Microsoft Edge browser desktop version

E1-33	Clear all filters and see all products	Given the user is on the Products page And the user has applied a name filter "Sansevieria" And the user has selected category "Plants"
-------	--	--

And the user has set the price filter with minimum "5" and maximum "50"

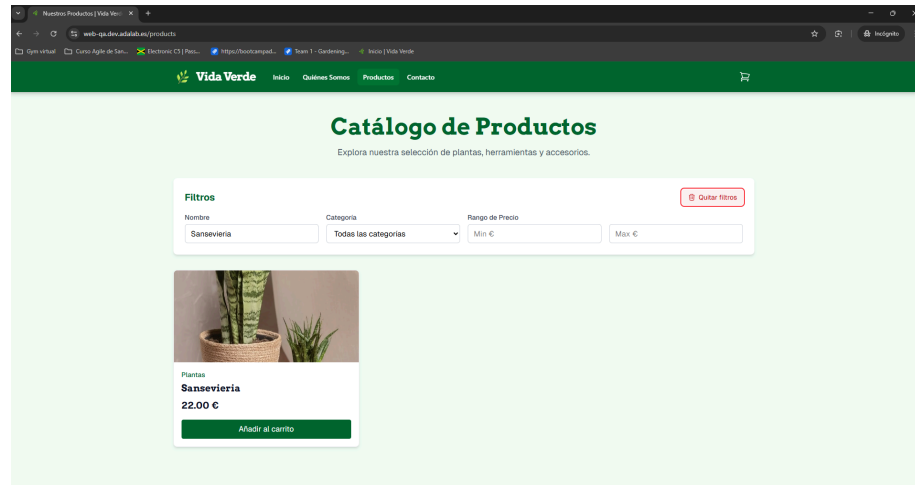

When the user clicks the "Clear Filters" button

Current results:

The filters are cleared.

The full product list is not displayed.

The name of the entered product is retained.

Expected results:

All filters should be removed

The full list of products should be displayed

No filters should remain active

Additional information:

Mobile Version

Google Chrome browser desktop version

Microsoft Edge browser desktop version

E1-32 No error showed when
invalid filters applied

Given the user is on the Products page with no filters applied

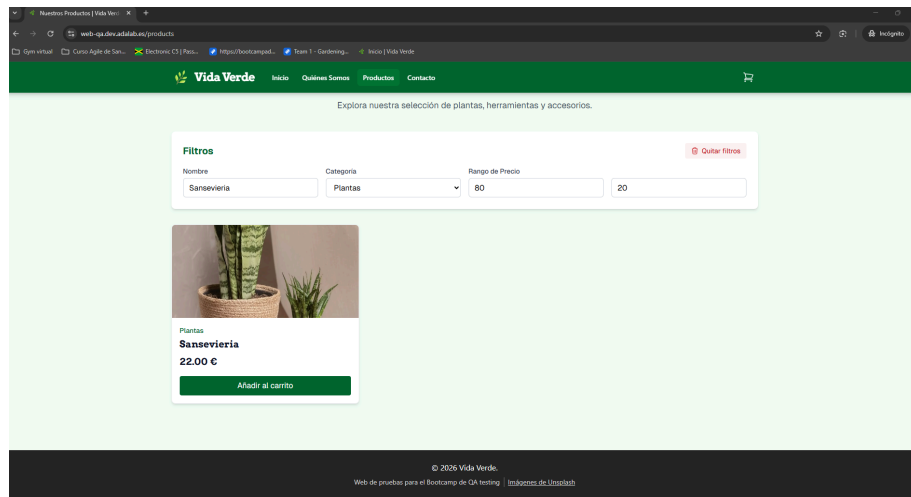

When the user applies a name filter "Sansevieria"

And the user applies a price filter with minimum "80" and maximum "20"

And the user applies a category filter "Plants"

Current results:

The product appears regardless of the price range selected.

Expected results:

Then an error message should be displayed

Additional information:

Mobile Version

Google Chrome browser desktop version

Microsoft Edge browser desktop version

E1-31 Mobile version – "About Us" link in navigation menu returns 404 Page Not Found in Google Chrome

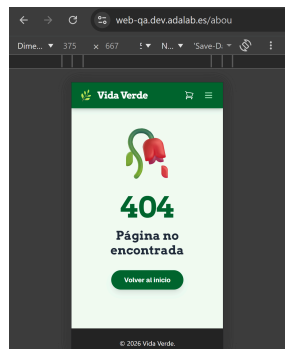

Steps to reproduce

Given user Opens the page

When clicking on the "About Us" link in the navigation menu

Actual result:

Then a 404 Page Not Found error is displayed.

Expected result:

The About Us page should load correctly when the user clicks on the link in the navigation menu.

Additional information:

The issue was reproduced in Google Chrome and Microsoft Edge using the mobile version of the website.

E1-30 Check out page Error - Submit form with invalid email

Given the user is on the checkout page

When the user enters an invalid email format

Current result: The form is submitted even with an invalid email format.

Then the form is submitted anyway.

Screencast From 2026-03-09 13-23-50.webm

Expected result: The form should not be submitted, and a message "invalid email format" should appear.

Additional information:

Google Chrome desktop version and Google Chrome mobile version

E1-29 [Check out page Error -
Entering a card number
with invalid spaces](#)

Steps to reproduce:

Given the user is on the checkout page
When the user fills in all the required fields and enters a valid card number but with spaces
Then a message appears stating that the card number must contain a maximum of 16 digits.

Current result: When the card number is entered with spaces every 4 digits, the message "maximum allowed 16 digits" is displayed.

[Screencast From 2026-03-09 12-55-26.webm](#)

Expected result: The form should be allowed to submit either by entering spaces every 4 digits or by removing the spaces and entering the card number continuously without spaces.

Additional information:

Google Chrome desktop version and Google Chrome mobile version

E1-28 [Contact Page Error -
Maximum message
length: 500 characters
invalid](#)

Steps to reproduce:

Given the user is on the contact page
When the user enters a message exceeding 500 words and submits it

Current result: The form is submitted even though the message exceeds the maximum of 500 words.

Then the form is submitted anyway.

[Screencast From 2026-03-09 12-33-01.webm](#)

Expected result: The form should not be submitted, and a message should appear indicating that the maximum allowed 500 words has been exceeded.

Additional information:

Google Chrome desktop version and Google Chrome mobile version

E1-27	Contact Page Error - Phone number invalid	Given the user is on the contact page When the user fills in the "Phone" field with an invalid format Current result: Then the form is submitted anyway. The form is submitted even with an invalid phone format (only one number, letters, or special characters). Screencast From 2026-03-09 12-18-31.webm  Screencast From 2026-03-09 12-19-04.webm  Screencast From 2026-03-09 12-19-44.webm  Expected result: The form should not be submitted with an invalid phone format. Additional information: Google Chrome desktop version and Google Chrome mobile version
E1-26	Contact Page Error - Submit form with invalid emails	Steps to reproduce: Given the user is on the contact page When enters an email with an invalid format And the user clicks send the form Current result: The contact form is submitted even when an email with an invalid email format is entered. Screencast From 2026-03-09 12-02-14.mpg  Screencast From 2026-03-09 12-03-16.mpg  Screencast From 2026-03-09 12-03-55.mpg  Screencast From 2026-03-09 12-04-28.mpg  Expected result: The contact form should not be submitted, and a message indicating an invalid email format should be displayed. Additional information: Google Chrome desktop version and Google Chrome mobile version
E1-25	Contact Page Error - Empty email field confirmation	Given the user is on the contact page with the email field empty When the user clicks the "Send Message" button Current result: The form is submitted without the email field. Screencast From 2026-03-09 11-57-00.mpg  Expected result: A message should appear indicating that the field cannot be empty. Additional information: Google Chrome desktop version and Google Chrome mobile version

E1-24 About Us Page(Image error from the team)

Given the user is on the Gardening Web Store homepage

When the user visits "About Us" page

Current result:

Information about the store's history and values appears.

The team image is not displayed.

An image appears of hands touching the grass

Expected results:

Information about the store's history and values should be displayed.

A picture of the team should be displayed.

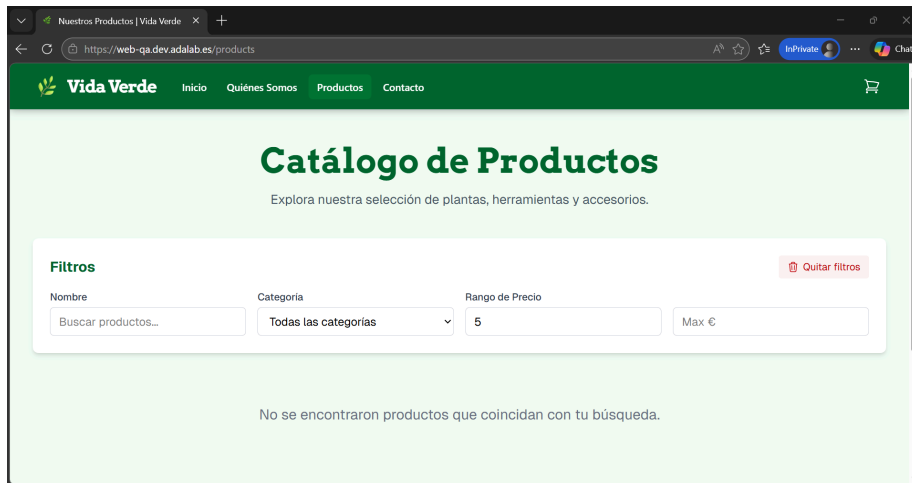

E1-21 Filter by min price valid

Given the user is on the Products page with no filters applied

When the user sets minimum price = 5

Current result:

Entering min price = 5, no products appear on the page.

Expected result

By entering min price = 5, only products with price greater than or equal to 5 should be displayed

Additional information:

Pixel 7 mobile version

Google Chrome browser desktop version

Microsoft Edge browser desktop version

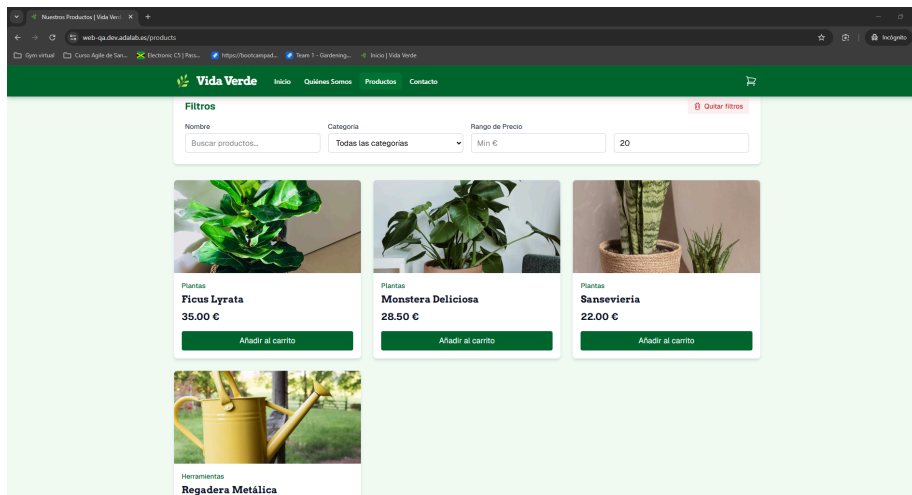

E1-18 Filter by max price valid

Given the user is on the Products page with no filters applied

When the user sets maximum price to "<max_price>" = 20

Current result:

Entering max price = 20 continues to display products with a price greater than 20

Expected result

By entering max price = 20, only products with a price less than or equal to 20 should be displayed.

Additional information:

Pixel 7 mobile version

Google Chrome browser desktop version

Microsoft Edge browser desktop version

E1-17 Error: Confirmation message – If you submit a new form, the previous confirmation message remains displayed.

Given the user visits the **Home page | Vida Verde**

When the user clicks the **“Contact”** button

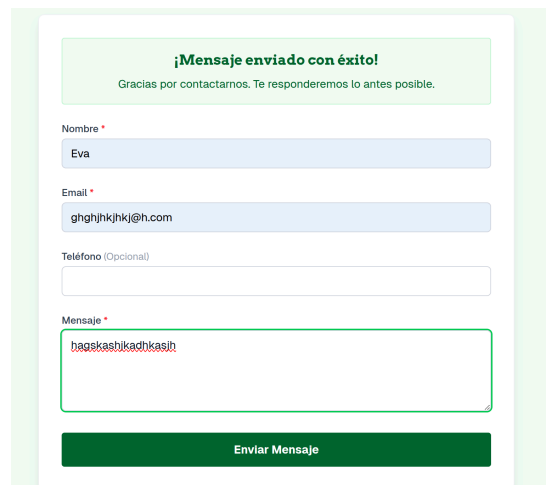

And fills out the contact form with valid data

And clicks **“Send Message”**

And the message **“Message sent successfully”** appears

And then submits a new form again with valid data

Current result:

A screenshot of a web form titled "¡Mensaje enviado con éxito!" (Message sent successfully!). Below the title is a green box with the text "Gracias por contactarnos. Te responderemos lo antes posible." (Thank you for contacting us. We will respond as soon as possible.). The form contains several input fields: "Nombre *" (Name) with the value "Eva", "Email *" with the value "ghghjhkhkj@h.com", "Teléfono (Opcional)" (Optional Phone), and "Mensaje *" (Message) with the value "hagskashkadhkasjh". At the bottom is a green button labeled "Enviar Mensaje" (Send Message).

[Screencast From 2026-03-07 14-37-58 \(fff04cc9-92fc-41b4-85bf-b3112e0c6503\).mpg](#)

Before clicking **“Send Message”**, the message **“Message sent successfully”** is already displayed at the top.

Additionally, if the page is refreshed, the same message continues to be displayed.

Expected result:

The form should not display the message **“Message sent successfully! Thank you for contacting us. We will respond as soon as possible.”** unless the form has just been submitted.

Additional information:

Google Chrome desktop version and Google Chrome mobile version.

E1-12 Filter by price range invalid (min > max)

Steps to reproduce:

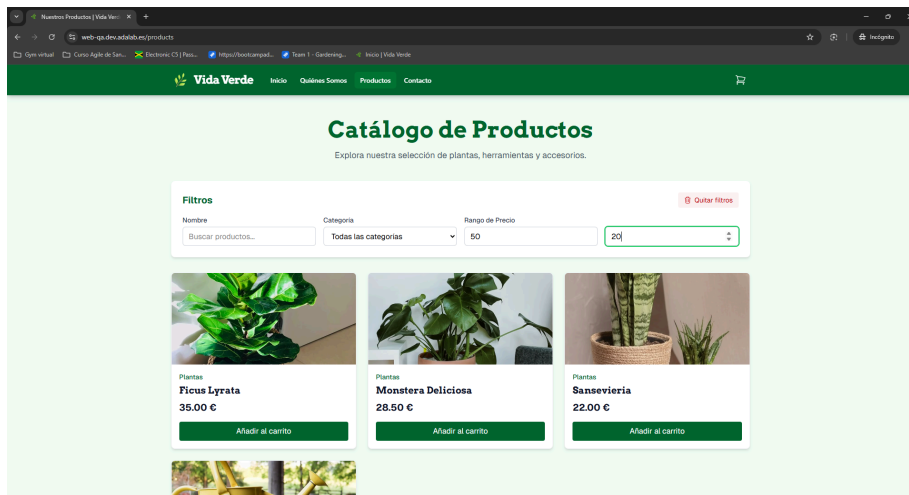

Given the user is on the Products page with no filters applied

When the user sets price range minimum "50" and maximum "20"

Then Some products from the page are still being displayed

Current result:

Products are shown that are not within the established range

Expected Result:

No products should be displayed and an informative message "No products found" should be shown

Additional information:

Pixel 7 mobile version

Google Chrome browser desktop version

Microsoft Edge browser desktop version

E1-11 Product Page - Filter by max price invalid

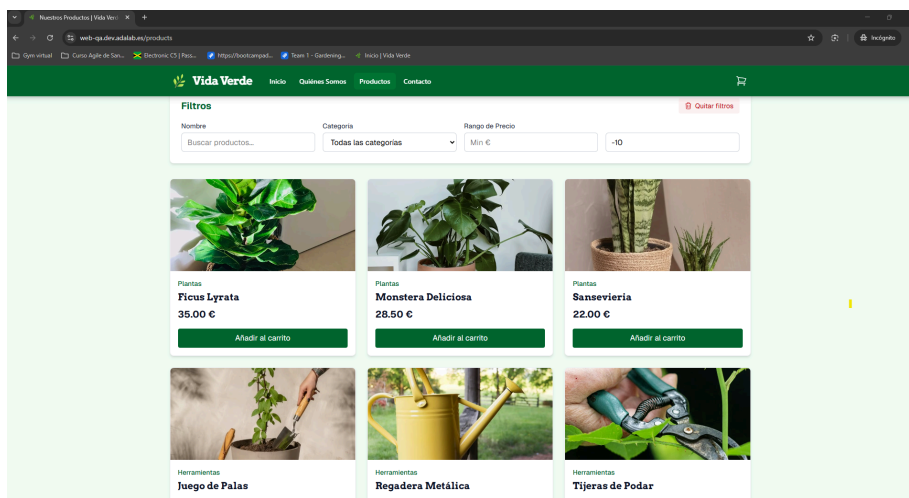

Given the user is on the Products page with no filters applied

When the user sets maximum price to "-10"

Then page continues to show all the products

Current result:

The page continues to show all the products

Expected result:

No products should be displayed and an informative message "No products found" should be shown

Additional information:

Pixel 7 mobile version

Google Chrome browser desktop version
Microsoft Edge browser desktop version

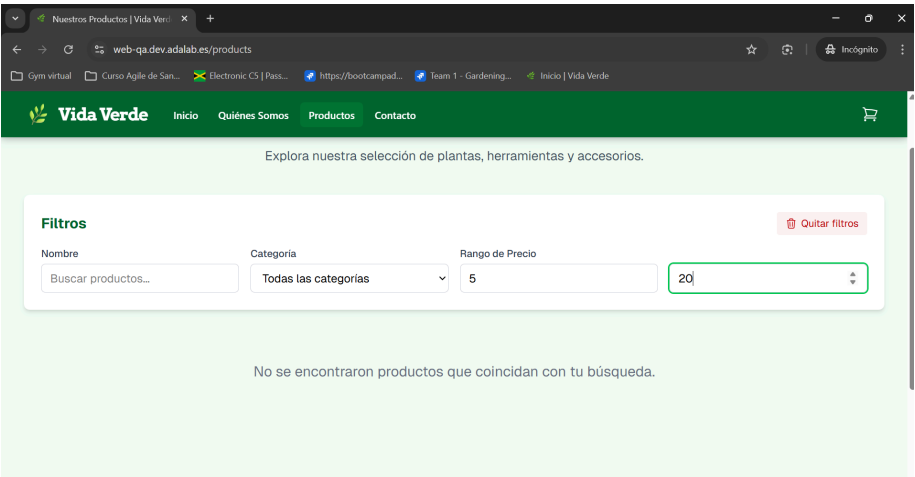

E1-9 Product Page Error -
Filter by price range
valid

Steps to reproduce:

Given the user is on the Products page with no filters applied
When the user sets price range minimum "5" and maximum "20"

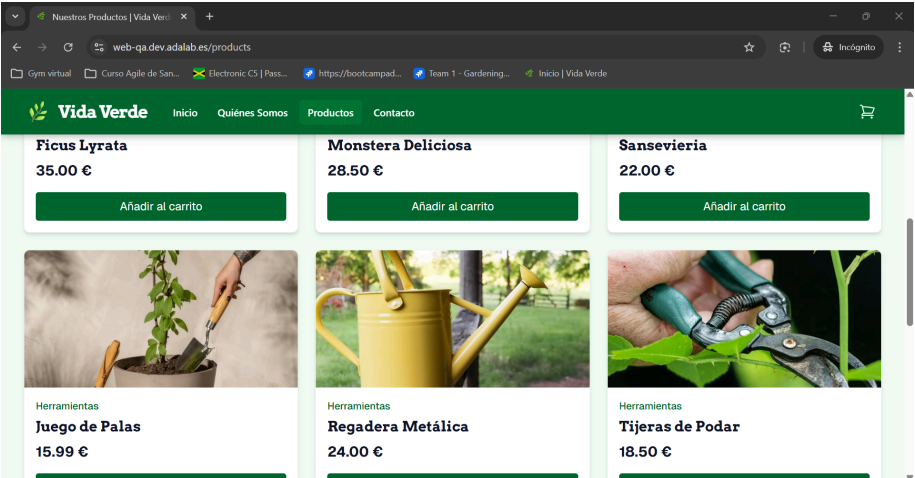

Current result:

No products appear in that price range

Expected result

Applying that filter should display products that actually exist within that price range.
